1   (3)   a financial datum;

2   (b)   the step of programming said computer to respond to a control signal;

3   (c)   the step of transmitting some information content and control signal to said

4   remote station in a broadcast or cablecast transmission, said information

5   content and said control signal including a first projected datum, said first

6   projected datum designating a product or service and being a projected

7   price or quantity;

8   (d)   the step of receiving said information content and control signal;

9   (e)   the step of storing said first projected datum in said computer;

10   (f)   the step of generating a budget by processing data stored in said computer

11   in response to said control signal, said budget including two or more of the

12   group:

13   (1)   an income datum;

14   (2)   an expense datum; and

15   (3)   a profit datum; and

16   (g)   the step of delivering to a subscriber some received information content and

17   one generated datum of said budget at an output at said remote station.

IN THE SPECIFICATION

On page 1, please rewrite the paragraph in the "Cross-Reference to Related

Applications" as follows:

This is a continuation of application serial no. 08/113,329, filed August 30, 1993,

herein incorporated by reference in its entirety, which is a continuation of application
